

RISK MANAGEMENT WORKSHOP

COURSE CODE

4222

COURSE COSTS

contact us for details

DURATION & LOCATION

2 days - online and onsite*

*min of 8 for onsite delivery

DEVELOPMENT UNITS

14

PRE-REQUISITES

Attendees need to have basic project management knowledge and experience. A minimum of one years' experience is recommended.

AUDIENCE

This course is intended for managers and project managers responsible for managing risks on projects.

DESCRIPTION

Most project issues develop over time – but issues are typically created in the early stages of the project. Effective risk identification with mitigation strategies will substantially increase project success and reduce issues. Attendees will receive training on applicable methods, techniques, and checklists specific to risk identification, risk analysis and risk mitigation. 2-3 projects from the client environment will be selected to apply risk management techniques to client specific projects. At the end of the workshop participants will have documented information on identified risks, analysis on those risks, and created a risk response plan for the high ranking risks. In addition, an overall risk management plan for each project will be drafted. Clients need to provide one laptop for every 5 participants.

KNOWLEDGE AREAS COVERED

PMBOK KNOWLEDGE AREAS

Project Communications Management | Project Stakeholder Management | Project Risk Management
