contact us for details

DURATION & LOCATION

2 days - online and onsite*

*min of 8 for onsite delivery

DEVELOPMENT UNITS

14

PRE-REQUISITES

A minimum of 2-3 years project management experience is required. Prior experience managing at least one software project (non-agile) is highly recommended.

AUDIENCE

This course is designed for experienced project managers.

DESCRIPTION

This course is designed for project managers who are responsible for managing agile projects. Learn techniques to understand how agile projects are different and the best techniques to manage them effectively and successfully. Understand how to avoid the common pitfalls of agile projects. The course will cover best practice project management techniques for a typical agile project lifecycle. Mindavation courses are highly interactive with challenging case studies and lectures filled with real life work scenarios. Students will team together to apply techniques learned from the lectures. Mindavation instructors for this course are PMI® certified, each have over 10 years of project management experience in multiple industries, and have directly managed agile projects successfully.

KNOWLEDGE AREAS COVERED

PMBOK KNOWLEDGE AREAS

Project Communications Management | Project Stakeholder Management | Project Human Resources Management |
