None

AUDIENCE

This course is designed for people who will be actively involved with projects. Typical attendees include: business analysts, managers, QA analysts and business and technical representatives.

DESCRIPTION

An overview of project management that includes all ten PMI® knowledge areas. Emphasis is provided on the team members' role throughout the project management lifecycle. Each topic is discussed briefly to ensure the team member is exposed to project management concepts necessary to manage a project from project initiation to project closeout.

KNOWLEDGE AREAS COVERED

PMBOK KNOWLEDGE AREAS

Project Communications Management | Project Stakeholder Management | Project Human Resources Management | Project Scope Management | Project Quality Management | Project Integration Management | Project Risk Management | Project Cost Management | Project Procurement Management

KEY LEARNING OBJECTIVES

· understand the definition of a project

· review the techniques to initiate a project successfully

· discuss methods to determine true business requirements

· understand stakeholder analysis techniques

· review typical team communication procedures

· develop a work breakdown structure

· review processes to estimate your project activities
