1/2 day - online and onsite*

*min of 8 for onsite delivery

DEVELOPMENT UNITS

4

PRE-REQUISITES

None

AUDIENCE

This course is designed for those new to Agile and want to understand the principles and approaches of Agile.

DESCRIPTION

This course is designed for managers who need to understand when and how agile principles can be applied to projects in their organisation. Attendees will learn techniques to understand how agile projects are different and the best techniques to manage them effectively and successfully. The course will also address the best ways to avoid the common pitfalls of agile projects.

The course will covers the elements of the agile project lifecycle and how managing an agile project is different than managing traditional projects. Attendees will also be exposed to the measurement and control processes inherent to agile project management.

Mindavation courses are highly interactive with challenging case studies and lectures filled with real life work scenarios. Students will team together to apply techniques learned from the lectures. Mindavation instructors for this course are PMI® certified, each have more than 10 years of project management experience in multiple industries and have directly managed agile projects successfully.
