DEVELOPMENT UNITS

14

PRE-REQUISITES

Attendees need to have basic project management knowledge or BA experience.

A minimum of one years' experience is recommended prior to taking this course.

AUDIENCE

This course is designed for business analysts, project managers, and other personnel responsible for business analysis activities.

DESCRIPTION

This course is an examination of the role of the business analyst and how the role fits into the development lifecycle. Areas of study include software development lifecycles, business requirements gathering techniques, documentation and verification processes to ensure your project starts off on the right foot. In addition, the analyst's enduring and pervasive responsibilities –from business case development to testing the final product, will be explored. Students will learn to discern between needs, characteristics and solution elements as well as techniques for managing the scope of the project throughout the project life cycle.

KNOWLEDGE AREAS COVERED

PMBOK KNOWLEDGE AREAS

Project Communications Management | Project Stakeholder Management | Project Scope Management | Project Quality Management | Project Cost Management

BABOK KNOWLEDGE AREAS

Requirements Life Cycle Management | Underlying Competencies | Requirements Analysis and Design Definition | Elicitation and Collaboration | BA Planning & Monitoring | Solution Evaluation | Techniques
